EXPANSION JOINT
(10mmx2.5m) Grey Infill

Box Qty 20 x Pcs Per Box
Code NY702

Aluminum Expansion Joints allow for thermal expansion and contraction in aluminum structures, preventing buckling, warping, or cracking. They accommodate movement caused by temperature changes, absorbing stresses and maintaining the integrity of the structure. Expansion joints are crucial in industries such as construction, automotive, and aerospace, where aluminum components are exposed to varying temperatures, ensuring the longevity and reliability of the system.
